

Our Energy Efficiency Solutions

1. ENERGY EFFICIENCY

- **Focus:** We are LED lighting specialist, providing best in class solutions for indoor, outdoor and specialized LED illumination solutions
- **Breadth:** We provide a comprehensive set of all energy upgrade options including HVAC, VFD, Demand Response & management
- **Automation:** We work with our clients to enhance the performance of LED systems with controls: dimming, RF +GPRS (Remote monitoring), RTC
- **Customization:** Through our design & manufacturing partners, we can deliver custom illumination solutions
- **Simulations:** We develop optimized illumination program by simulating the actual lighting environment

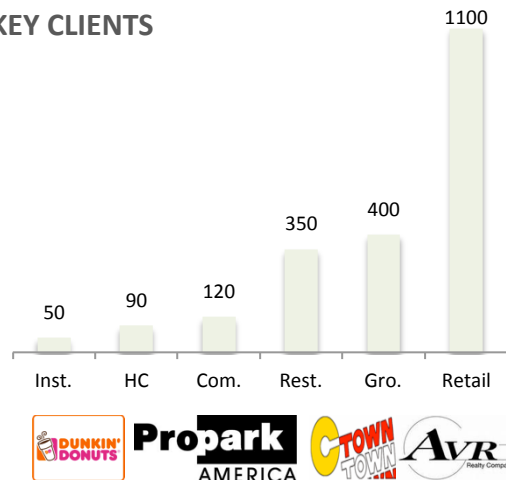

2. PROJECT MANAGEMENT

- **Audit:** We perform a comprehensive assessment (ASHRAE II) of the clients energy footprint covering all the connected devices
- **Analysis & Recommendation:** We develop the most cost effective plan for the client
- **EPC:** Turnkey service includes, engineering, procurement, installation and rebate management
- **Measurements & Verification:** Energy requires a long term approach, we remain engaged with the client managing & tracking energy performance

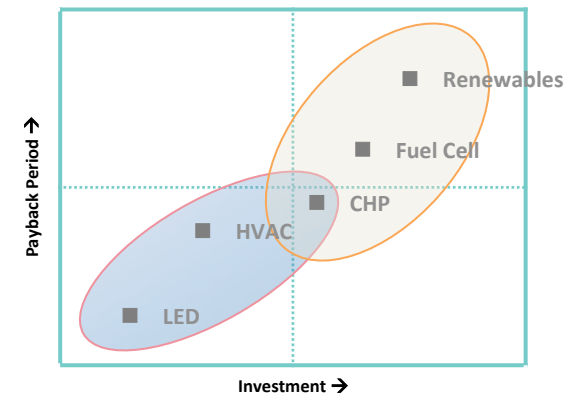

3. PORTFOLIO SOLUTION

- We provide our clients with the ideal mix of efficiency, demand management & supply and generation solutions.
- We have two programs in which we engage with the client on a long term basis enabling carbon free energy.
 - Carbon Neutral (5-10 year)
 - Carbon Zero (10-15 year)

KEY CLIENTS

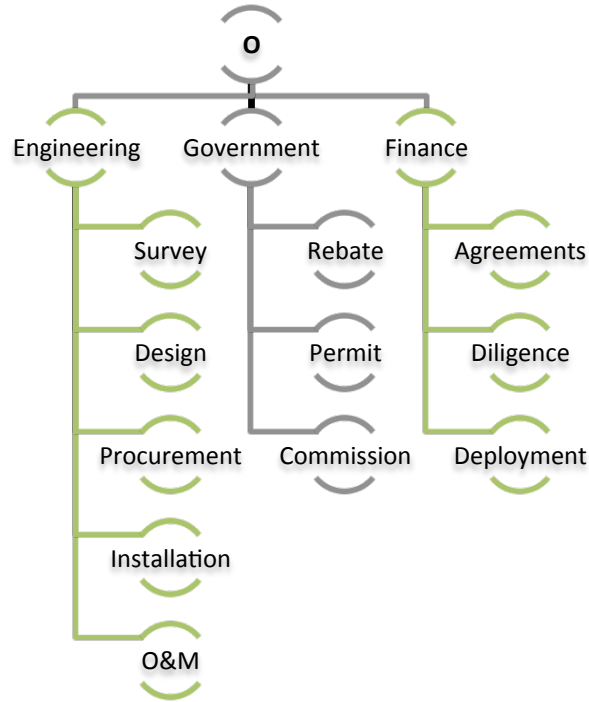

Solving your energy challenge today...

Energy Generation & Management

- **Solar PV**
 - We provide seamless turnkey experience with certain performance guarantees

- **Demand Management & Response**
 - We utilize battery storage / CNG generation combined with efficiency measures to manage demand spikes

Energy Finance

Through our strategic partners we are able to provide our clients any of the following long term financing alternatives

- *Lease Offerings:*⁺
 - *Operating leases:* This model is effective for municipalities
 - *Capital leases:* This model is excellent for business owners since it provides the benefit of tax shield
- *Custom Offerings:*
 - Power Purchase Agreements
 - Long term shared energy savings

Why us?

- Post financial diligence, projects get funded within 2 – 3 weeks
- Incremental project financing is available under a single approved application
- Most competitive & quickest financing terms
- We strive to provide immediate cash flows benefits on all energy solutions

⁺ Preferred option

LED & Solar Installation sites

Hotel Lobby

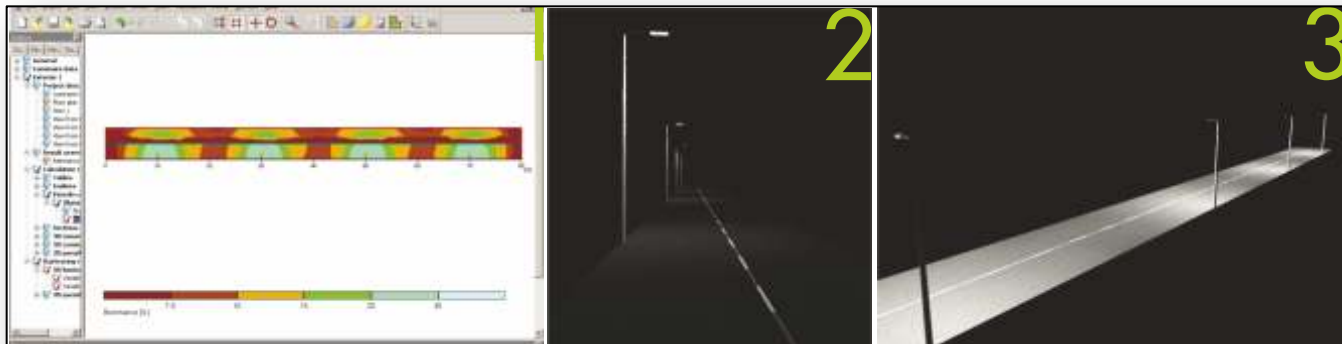

Doctor's Clinic

Rooftop solar restaurant

Illustration of Design / Audit / Compliance studies

Dialux / Relux lighting study for freeways

We are NY state & city approved MBE

We approved business partners with several utilities & organizations

TEAM

Nitin

A financial expert, Nitin sought to fundamentally solve the energy infrastructure challenges by resolving the financial impediments in all ES offerings.

**Abhishek
(Abi)**

An engineer by training, Abi developed a portfolio of energy efficient products & services. He then established a design & manufacturing base in India

Our values are represented by our products & solutions and goal is to grow through healthy, long term partnerships.

- **Loyalty**
We believe in mutual growth. This is reflected in our B2B partnerships as well as commitment to our end – users.
- **Quality**
We believe over time quality prevails over myopic decisions. We have infused this philosophy in our products also.
- **Innovation**
Long term growth comes through value creation. We therefore invest constantly in developing novel solutions as well as improving our existing line.
- **Performance**
An opportunity has a time value and we believe in participating in it without losing time. Therefore, timely performance is essential to our success.
